ITS2 samples + plate maps for sequencing

This post has information about the ITS2 samples that were sent for sequencing, along with the plate maps. The samples came from Ariana's larvae C/D experiment, my Mcap DT 2023 experiment, POC spawning 2023, and Stefane's stuff. Larvae C/D github repo is [here](#); Mcap DT 2023 github repo is [here](#); POC github is [here](#). See previous posts (ITS2 [amplification](#) and [clean up](#)) for more information about the PCR and clean-up steps of the protocol.

Now that the samples have been properly amplified and cleaned, they are ready to be sent to Janet at [Ri INBRE Molecular Informatics Core](#) for ITS2 amplicon sequencing.

Samples

- R## samples = Ariana samples
- M## = my samples
- Number## = POC samples
- S## = Stefane's samples

Plate	Well	Sample ID	Sequencing ID	Volume (uL)	Type
1	A1	R55	HP801	20	ITS2 amplicon
1	B1	R56	HP802	20	ITS2 amplicon
1	C1	R57	HP803	20	ITS2 amplicon
